*Statement of Reasons for Allowance*

1. Claims 1-22 are allowed.
2. The following is an examiner's statement of reasons for allowance.

The present invention is directed to a system and user interface for communicating and processing patient record information.

Claims 1, 17 and 22 recite, or similarly recite, in combination with the remaining elements, the steps of establishing a bidirectional communication link with a second portable processing device, validating identification data of a medical information recipient associated with said second portable device to determine said recipient is authorized to access said selected information, and communicating patient identification information and said selected information on said established communication link in response to user selection of a displayed icon.

The closest prior art, Mayaud (US 5,845,255) and Obradovich et al. (US 20020013815 A1), show a substantially similar method for transferring medical record information of a patient between processing devices. However, Mayaud and Obradovich et al., singularly or in combination with other prior art of records, still fail to anticipate or render the above cited limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
